

Additional drugs will have requirements for URMBT members with Blue Cross non-Medicare plans

For dates of service on or after Nov. 1, 2022, the following drugs will require prior authorization through either the NovoLogix[®] online tool or AIM Specialty Health[®] and may also have site-of-care requirements, quantity limit requirements or both. These requirements will apply to UAW Retiree Medical Benefits Trust members with Blue Cross non-Medicare plans. These drugs are part of members' medical benefits, not their pharmacy benefits.

See the table for more information. When a cell is blank, the drug doesn't have that requirement.

How to submit authorization requests

Submit prior authorization requests through NovoLogix or AIM, as specified above.

If you have access to the Availity Essentials provider portal (availity.com*), log in to Availity®, click *Payer Spaces* and then click the BCBSM and BCN logo. This will take you to the Blue Cross and BCN payer space, where you can click the appropriate tile on the Applications tab.

If you need to request access to Availity, follow the instructions on the [Register for webtools](https://bcbsm.com/providers) webpage at bcbsm.com/providers.

More about the authorization requirements

Authorization isn't a guarantee of payment. As always, health care practitioners need to verify eligibility and benefits for members.

For additional information on requirements related to drugs covered under the medical benefit for URMBS members with Blue Cross non-Medicare plans, see:
