

Questionnaires to be removed from e-referral system on Dec. 18

On Dec. 18, 2022, we'll remove the following questionnaires from the e-referral system:

- *Cardiac rehabilitation* for adult and pediatric BCN commercial members — This questionnaire will no longer open for procedure codes *93797 and *93798.
- *Pulmonary rehabilitation* for adult and pediatric BCN commercial and BCN Advantage members — This questionnaire will no longer open for procedure codes G0237, G0238, G0239, G0302, G0303, G0304, G0424 and S9473.

Although these procedure codes no longer require prior authorization, you need to submit plan notification because these services have benefit limits. Within the benefit limit, the e-referral system will automatically approve plan notification requests. Any requests received after the benefit limit has been exhausted won't be approved.

Note: We'll also remove the corresponding preview questionnaires from the ereferrals.bcbsm.com website.
