

Members may call about colorectal cancer screening

In mid-March, Blue Cross Blue Shield of Michigan and Blue Care Network will reach out to commercial members age 45 or older who are due for a colorectal cancer screening. We'll contact them by email, as part of our National Colorectal Cancer Awareness Month outreach efforts.

We'll encourage these members to contact their primary care provider to discuss getting screened and to schedule an appointment.

As a result, you may get calls about this from members in the next few weeks. We wanted to alert you before we start sending the member outreach emails.
