

Requirements for prior authorization of Omisirge

Omisirge® is a new-to-market cellular therapy that was recently approved by the Blue Cross Blue Shield of Michigan and Blue Care Network Pharmacy and Therapeutics committee.

On May 23, 2023, we published a [provider alert](#) stating that Omisirge will require prior authorization for most commercial members for dates of service on or after June 8, 2023.

Important: The member must have an approval for a stem cell transplant on file through the Blue Cross and BCN Human Organ Transplant Program before a prior authorization request for Omisirge can be approved.

You can view the complete requirements in our Omisirge medical policy. To access the medical policy:

1. Go to **bcbsm.com/providers**.
2. Click *Resources*.
3. Click *Search Medical Policies*.
4. In the [Medical Policy Router Search](#) page, enter *Omisirge* in the Policy/Topic Keyword field and press *Enter*.
5. Click the link to open the Omisirge medical policy.
