

New information about Winrevair SC for commercial members

We previously communicated that Winrevair™ SC (sotatercept-csrk), HCPCS code J3590, is covered under members' medical benefits and requires prior authorization for most Blue Cross Blue Shield of Michigan and Blue Care Network group and individual commercial members.

However, effective immediately, this drug is self-administered and is billable only under the pharmacy benefit for commercial members.

To determine whether this information applies to Blue Cross and Blue Shield Federal Employee Program® members and UAW Retiree Medical Benefits Trust (non-Medicare) members, check each member's benefits.

Note: For information about this drug for our Medicare Advantage members, refer to [this provider alert](#).
