

## **Starting Feb. 1, 2025, Cimzia will change to nonpreferred on our prescription drug plans**

Starting Feb. 1, 2025, we'll change how we cover Cimzia® on the drug lists associated with our prescription drug plans.

Cimzia is currently a preferred drug on our prescription drug plans. However, starting Feb. 1, 2025, Cimzia will change to a nonpreferred drug on our prescription drug plans. With this change, members' copays may change, and they may pay more than they currently pay.

We are notifying affected members of this change and recommending they talk to their doctor about which preferred alternative drug is right for them. Preferred alternative drugs with similar safety and efficacy typically have a lower copay than nonpreferred drugs. Additional coverage requirements may apply for preferred alternatives.
