

Isembyld IV and Fayuvi IV to require prior authorization for most members starting Sept. 28 and Oct. 1

To help meet our goal of promoting safe, effective treatment while responsibly managing healthcare costs, Blue Cross Blue Shield of Michigan and Blue Care Network will require prior authorization for the following drugs covered under the medical benefit. This requirement supports clinically appropriate, cost-effective care and helps ensure medical benefit drugs are used safely and effectively.

Brand name	Generic name	HCPCS code	Lines of business	For dates of service on or after
Isembyld™ IV	apitegromab-mstn	J3590	- Blue Cross commercial¹ - BCN commercial	Sept. 28, 2026
			- Medicare Plus Blue² - BCN Advantage²	Oct. 1, 2026

¹For Blue Cross commercial, requirements apply to all fully insured members (group and individual) and to groups that participate in the standard commercial Medical Drug Prior Authorization Program for drugs administered under the medical benefit. To determine whether a group participates in the prior authorization program, see the [Specialty Pharmacy Prior Authorization Master Opt-in/out Group list](#). Note that Blue Cross and Blue Shield Federal Employee Program[®] members and UAW Retiree Medical Benefits Trust (non-Medicare) members don't participate in the standard prior authorization program.

²For Medicare Advantage members, drugs require prior authorization when administered by a healthcare provider in sites of care such as outpatient facilities or physician offices and are (a) billed electronically through an 837P transaction or on a professional CMS-1500 claim form or (b) billed electronically through an 837I transaction or using the UB04 claim form for a hospital outpatient type of bill 013x.
