

Starting Jan. 1, 2027, there'll be changes to how certain medications are covered on the Premium Drug List

Starting Jan. 1, 2027, certain medications will no longer be covered, and brand-name drugs will transition to generic alternatives when available. Additionally, certain covered medications may move to a different coverage tier, be subject to quantity limits or require step therapy to ensure appropriate clinical use.

This will apply to Blue Cross Blue Shield of Michigan commercial and Blue Care Network commercial lines of business.

For details, check out the [Premium Drug List changes for 2027](#) document.

The changes will appear on the Premium Drug List on Jan. 1, 2027, at **bcbsm.com/premiumdruglist**.

We plan to send letters in mid- to late October to notify affected members, their groups and their healthcare providers about these changes.
